

Hardness Testers
Rockwell Minor R & Minor S
Pro Series

MPM is an authorized distributor of Hoytom Universal Hardness Testers. MPM provides installation, maintenance, and calibration services for all equipment sold within the USA.

The Minor-R and Minor-S models are quick and simple hardness testers, that enable direct readings to be taken using the Rockwell and Rockwell superficial scales, respectively.

Test loads are applied via the incorporated lever and weight system. Loads are easily selectable via a rotary dial.

Optional Accessories:

Reference Block

Indenter

Technical Characteristics
